The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1,3-7,9 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams in view of Kalnitsky and Wolf, Vol.2.

The rejection is maintained as stated in the paper mailed 4/29/04 and as follows.

The device produced by the process of the combination of Williams in view of Kalnitsky and Wolf, Vol.2 would exhibit the recited properties because the same materials would be treated in the same manner as in the instant invention disclosed on instant page 14, for example. Furthermore, the device would have the recited properties because the claim does not set forth the degree to which the device exhibits the properties.

Applicant argues that the references do not disclose formation of P-channel device. However, Williams discloses formation of a P-channel device in figure 6 and Kalnitsky and Wolf et al are not limited to either N-channel or P-channel devices.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2823
